

Stepsolve Anti-Slip

GRIT COATED ABRASIVE PRODUCTS

STAIR NOSING, SAFETY PLATES & LADDER RUNGS

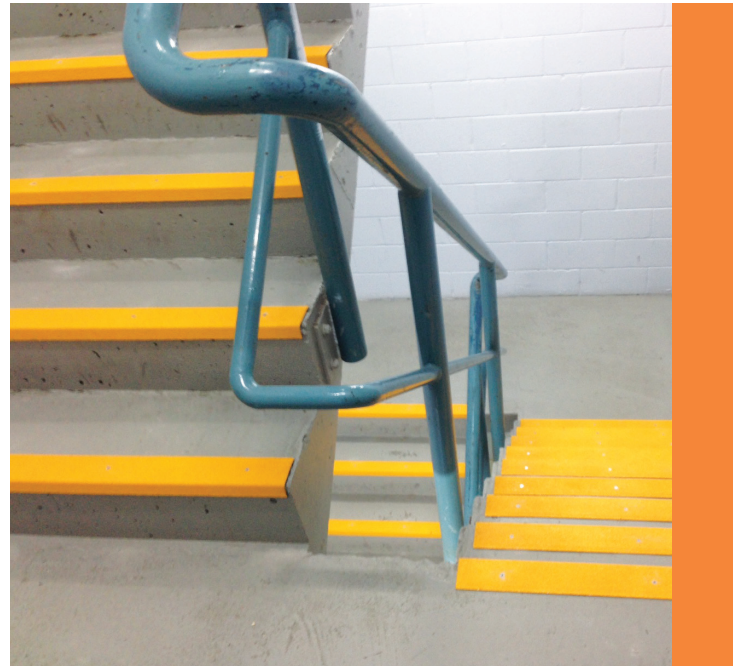

Stepsolve's abrasive grit-coated safety products provide a permanent anti-slip solution for hazardous areas and are designed to meet AS/NZS 4586:2004 Slip Resistance Safety Standards.

Made of 1.6mm galvanized metal, they are coated with a heavy-duty, chemical resistant, anti-slip grit coating. Probably the most robust anti-slip available, Stepsolve Anti-Slip grit coated products are designed to withstand high volume pedestrian traffic and extremes of temperature.

The range offers a permanent, hard-wearing solution to slips, trips and falls in industrial, food, offshore and public access areas. Will withstand abrasion, impact and chemical spillage, whilst being slip-resistant even when impregnated with water, oils, grease, acids, alkalis and salts.

Designed specifically for use on floors, stairs, ramps, walkways, ladder rungs and external fire escapes.

Can be supplied pre-drilled and countersunk for quick and easy fixing to chequer plate, metal grills, concrete and wood, ensuring minimum downtime and disruption to traffic.

STAIR NOSINGS

Stepsolve's grit coated stair nosing's are designed to provide sure footing and prevent slip and trip accidents as well as highlighting the step edge.

Choose from our standard size range or can be custom made to suit. Optional in stainless steel.

Sizes: 50mm x 30mm, 75mm x 30mm & 90mm x 30mm.

Available in 3 colours:

- Safety Yellow
- Black
- Grey

SAFETY PLATES

Stepsolve grit coated plates provide on-going slip resistance on bridges, loading platforms, pavements, ramps, walkways and work platforms. Custom made sizes to suit.
