

Stepsolve Anti-Slip

SAFETY TAPES

BENEFITS

Stepsolve Anti-Slip tapes offer a low cost, immediate solution to slip problems in internal and external areas where there is a medium level of pedestrian activity.

Stepsolve Anti-Slip tapes are R13 rated and comply with the anti-slip Standards and Building Codes.

Manufactured from a unique combination of aluminium oxide which is diamond hard and a thick flexible plastic carrier to provide a hard, tough, durable and long lasting solution. They are marine grade and are manufactured from a water resistant carrier and adhesive.

The tapes feature a peel off, self-adhesive backing and are easily cut to size for fixing to metal, wood and concrete.

They are particularly suitable for use on clean, dry, flat areas but can be fixed to uneven surfaces if a primer is used.

Stepsolve Anti-Slip tapes range from 25mm to 300mm in width and are 18.3 metres in length.

AVAILABLE IN 6 COLOURS

Stepsolve Anti-Slip tapes are available in 6 colours to meet the luminance contrast requirements of AS/NZS1428.1 - Design for access and mobility.

- **Black**
- **Grey**
- **Yellow**
- **Hazard Strip (Black & Yellow)**
- **Photo Luminescent**
- **White**
- **Clear**

Photo-luminescent tape is ideal for stairwells, ramps & escape routes; and white and clear water resistant tape for showers, bathrooms and other wet areas. The clear tape is suitable for use in listed buildings where the use of coloured tape may not be appropriate.

SURFACE PREPARATION

Apply tape only to a clean, dry, grease & dust free surface. Press firmly into position. Best adhesion at 23C.
